

Specified Weighted Shower Curtains by Health @ Home, Inc.

Shown above with collapsible rubber dam.

Shall be equipped with heavy tape weights in the bottom seam engineered and tailored specifically for use in commercial barrier-free, curb-less, or low threshold shower stalls. The curtain must meet or exceed the following requirements. The width shall be a minimum of 6” wider than the pre-determined shower opening. The curtain shall be a standard 72” height unless a custom height is specified and it must be installed such that it touches the floor of the shower to effectively control water spillage. Material shall be a soft nylon polyester fabric, standard color white, machine washable, splash resistant, bacterial resistant, stain resistant, and flame resistant. Material shall meet all state and federal code compliance regulations. Each curtain shall include twelve clear plastic hooks. Model number – sizes available - application:

CUR133ET* 66”w x 74”h for 72” opening in bright white
